PROFILE

Product Leader with 7+ years in product management delivering high-scale B2B SaaS for Mastercard, The Adecco Group, and Accenture. Expert in scaling data platforms and MarTech ecosystems, currently managing a Mastercard (SessionM) data platform serving 50+ enterprise clients and millions of users. Proven track record of high-stakes impact: delivered $1M in annual cost savings, drove 20+ enterprise client adoptions of BYOD features, and improved sprint carryover by 80%. A decisive leader recognized for bridging deep technical architecture (Lakehouse/Medallion) with executive-level strategy to drive commercial growth.

EXPERIENCE

Lead Technical Product Manager | Mastercard (SessionM) | Aug 2024 – Present

- **Platform Strategy**: Owned the roadmap for a core data lake serving 50+ enterprise clients and 5 internal teams; prioritized real-time data, new data use cases and products while balancing governance, cost and maintenance.
- **Customer Impact**: Designed and launched the "Bring Your Own Data" (BYOD) feature, adopted by 20+ enterprise customers to enable custom audience targeting and campaign health initiatives.
- **Growth & Retention**: Identified and integrated key data attributes to unlock new segmentation use cases, directly contributing to the retention of 5+ key accounts and winning a major Australian grocery chain.
- **Operational Excellence**: Spearheaded the definition of org-wide product operating standards (lifecycle, DoD, prioritization) and built an automated data catalog using AWS Glue to streamline cross-functional governance. Reduced sprint carryover by 80% and met all cross-team dependencies deadlines in 2025.
- **Leadership**: Led interview case studies for the Technical Product Management team and provided direct mentorship to Junior Product Managers. Trusted point of contact for all data platform dependencies related to wider product initiatives & feature requests.

Senior Product Manager | Mastercard (SessionM) | Mar 2022 – Aug 2024

- **Strategic Leadership:** Defined and secured SVP-level approval for a multi-year data strategy, establishing the foundational roadmap for all subsequent data product investments.
- **Cost Optimization:** Delivered $1M in annual cost savings (2023) by identifying redundant data storage and processing.
- **Governance & Privacy:** Revitalized org-wide GDPR and data privacy frameworks, ensuring platform-wide compliance and reducing data-handling risks.
- **Commercial Growth:** Built the data platform foundations that directly supported SessionM's commercial expansion and enterprise client scaling.

Technical Product Lead – Web Platform | The Adecco Group | Nov 2020 – Mar 2022

- **Global Consolidation**: Led a 15-person cross-functional team to centralize multiple sub-brand websites into a unified global web platform, standardizing architecture and UX. Co-led architecture and technology selection to ensure the new platform supported global scalability and cross-brand integration.
- **Stakeholder Alignment**: Negotiated requirements across global Marketing, IT, and regional managers to align diverse MarTech needs into a single product vision.
- **Vendor Management**: Managed external engineering suppliers and delivery processes, ensuring high-quality output and adherence to project timelines.

Product Owner / Manager – Procurement Platforms | Accenture | Dec 2018 – Nov 2020

- **Full-Cycle SaaS Management**: Managed the RadixOne (Project Management SaaS) roadmap from MVP launch through iterative scaling; partnered with UX and Engineering to ship UI, analytics, and AI enhancements.

- **AI Product Launch**: Designed and launched "Alma," an AI-powered chatbot; scaled adoption to five enterprise clients via direct integration support and global stakeholder engagement.
- **Agile Leadership**: Orchestrated the product lifecycle using Agile methodology; led stand-ups, conducted backlog grooming, and collaborated with the Senior PO to align priorities with the long-term roadmap.
- **Global Enablement**: Acted as the primary engagement lead, conducting virtual and in-person training sessions globally to drive platform proficiency and gather localized business requirements.

Product & Business Analyst | Accenture | Dec 2016 – Dec 2018

- **Regional Product Ownership**: Served as the EMEA lead for a global procurement suite (Sourcing, P2P, CMS); translated complex regional requirements into technical specifications for the backend engineering teams.
- **Data Migration & QA**: Orchestrated a large-scale data migration between Content Management Systems; mapped data paths, managed UAT (User Acceptance Testing), and ensured 100% data integrity for global business stakeholders.
- **Lifecycle Support & Governance**: Managed the end-to-end feedback loop for internal applications; analyzed system performance data and user feedback to prioritize enhancement requests for the Product Owners.

HR Functional Consultant – Workday Implementation | Accenture | Jun 2015 – Dec 2016

- **System Implementation**: Acted as a functional SME for a global Workday HCM rollout, bridging HR business requirements with technical configurations. Led data audit and reconciliation workstreams during the transition from legacy PeopleSoft systems to ensure data integrity.

SKILLS

- **Data Architecture & Strategy**: Deep understanding of Data Lakehouse (Medallion), AWS S3/Athena, Delta Lake, and Spark processing. Expert at evaluating trade-offs between Real-time Data vs. Micro-batch/Batch ingestion and Data Warehousing vs. Data Marts to optimize cost and latency. Experienced in defining schema standards to streamline cross-team data consumption.
- **AI & Technical Augmentation**: Proficient in leveraging LLMs (Claude, ChatGPT, Copilot) to accelerate product research, prototyping and design as well as Python scripting, YAML/JSON schema design. Familiar with Agentic AI, Machine Learning and other AI disciplines (rule-based, reinforcement learning).
- **Strategic Influence**: Expert at translating complex architectural concepts into business value for SVPs, while clearly articulating "the why" to engineering teams to ensure roadmap alignment and execution.
- **Product Management:** Agile/Scrum/Kanban mastery, PRDs, Epics, User Stories, Roadmaps, User Interviews, Requirements.
- **Leadership:** Cross-functional Team Leadership (15-person teams), Mentorship & Coaching, and Global Vendor Management.

EDUCATION & CERTIFICATIONS

- BSc Computing & Information Systems (specializing in AI) - University of London
- MicroMasters in Digital Product Management - Boston University
- Introduction to UX Design - Georgia Institute of Technology
- Lean Product Management - Mastercard (Jeff Gothelf & Josh Seiden)
- Co-pilot for Product Research - Mastercard
